

Demo Resets – Walkthrough Instructions

Demo Instructions

You can follow along with your instructor to complete this build and/or you can use this document as a guide in completing the demo build.

Steps

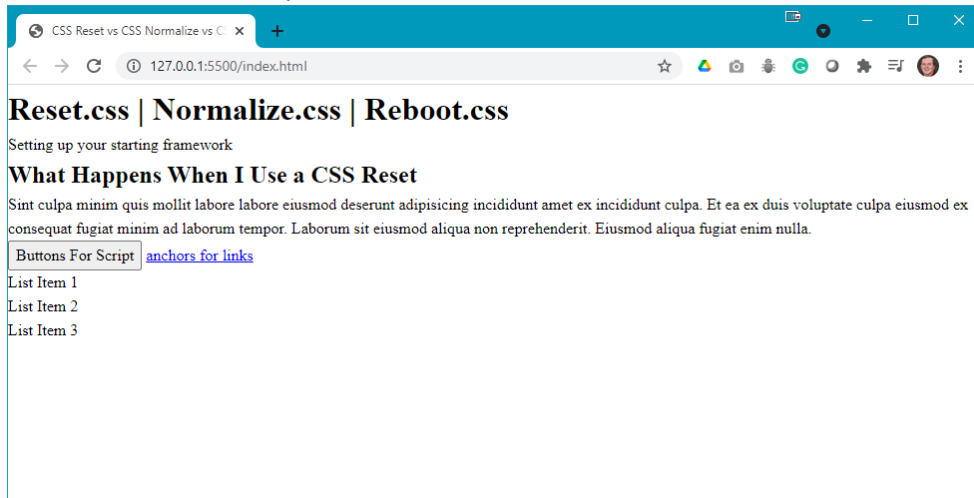

1. Download the **demo-reset.zip** file from Moodle and extract its contents to a folder named **demo-reset**.
2. Open **index.html** in your browser to see something like:

3. In your code editor you will see the following code:

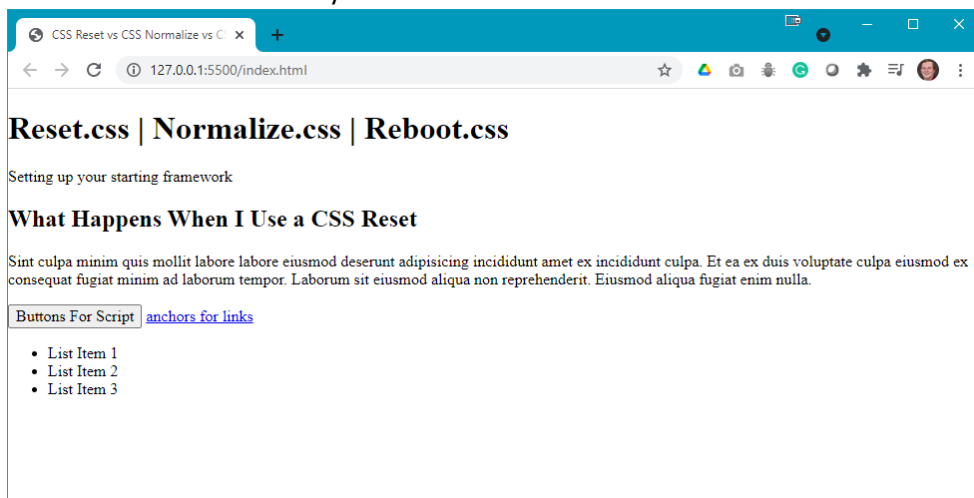

```
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <meta http-equiv="X-UA-Compatible" content="ie=edge">
  <title>CSS Reset vs CSS Normalize vs CSS Reboot</title>
  <!-- <link rel="stylesheet" href="css/reset.css" -->
  <!-- <link rel="stylesheet" href="css/normalize.css" -->
  <!-- <link rel="stylesheet" href="css/reboot.css" -->
  <link rel="stylesheet" href="css/style.css">
</head>
```

4. Uncomment the first stylesheet link for **reset.css**, save and refresh the browser to see:

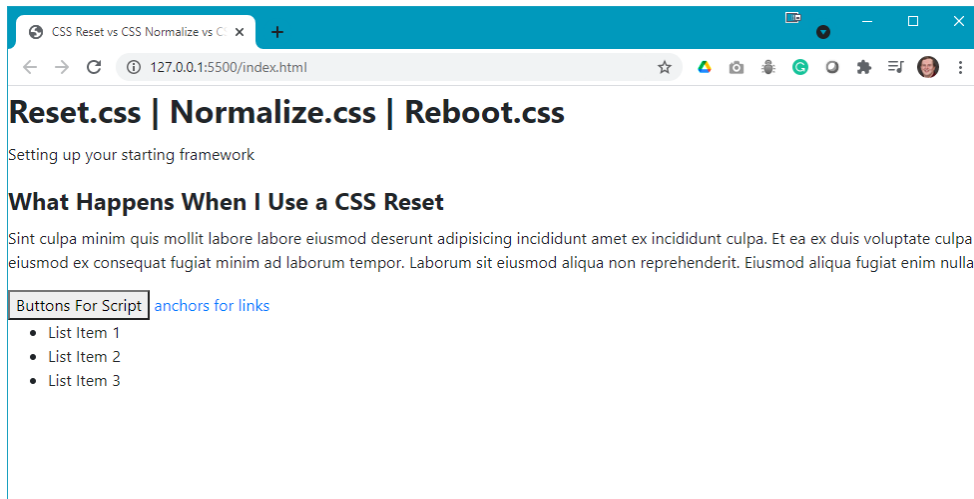

Question: What happened?

5. Have a look at the **reset.css** code to verify your answer.
6. In your code editor, comment out the **reset.css** and uncomment the link for **normalize.css**. Refresh your browser to see:

Question: What difference did this make?

7. Have a look at the **normalize.css** code to verify your answer.
8. Back in the code editor, comment out the **normalize.css** link and uncomment the **reboot.css** link. Save and refresh your browser to see:

Question: What difference did this make?

9. Have a look at the **reboot.css** code to verify your answer.
10. **Question:** which one of the three stylesheets do you use?
11. You need to markup your document in the <head> using a <meta> tag. Add the following code to your **index.html** file:

```
<meta name="description" content="Add a description using keywords that summarizes the content on the web page. This description is used in search engine results and is good practice for SEO.">
```

Note: Google results will now truncate the description at ~300 characters. Previously it was recommended to keep the description length to 50 - 160 characters, but now that can increase to around 300.

You need to customize the content to match the summary of the web page.
