

Media Queries – Walkthrough Instructions

Demo Instructions

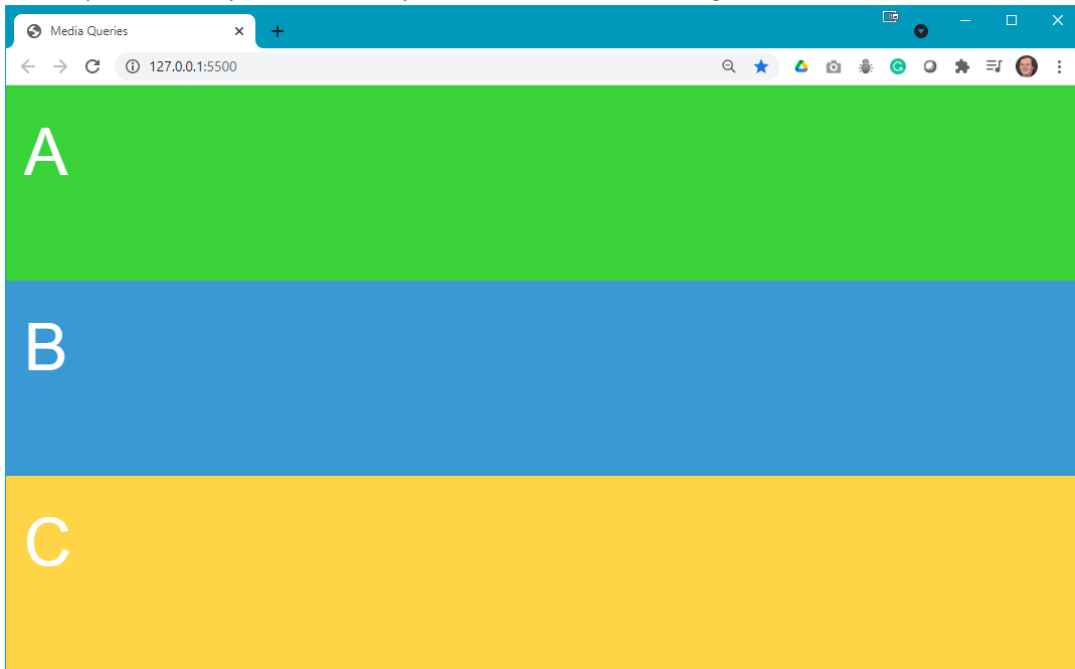

You can follow along with your instructor to complete this build and/or you can use this document as a guide in completing the demo build.

Steps

1. Download the **demo-media-queries.zip** file from Moodle and extract its contents to a folder named **demo-media-queries**.
2. A wide resolution of the **index.html** should look like:

3. When you narrow your browser, you want to see something like:

Note: the color changes.

4. Open the **styles.css** file and scroll down to find the comment about Media Queries and add the following:

```
@media only screen and (min-width: 800px) {  
  .a {  
    background-color: #39d339;  
  }  
}
```

Question: What did this media query do?

5. Add the following query below the one you just added:

```
@media only screen and (min-width: 1000px) {  
  .b {  
    background-color: #3999d3;  
  }  
}
```

Question: What did this media query do?

6. Now add the last media query:

```
@media only screen and (min-width: 1200px) {  
  .c {  
    background-color: #a543e8;  
  }  
  .a,  
  .b,  
  .c {  
    width: 75vw;  
    margin: 0 auto;  
  }  
}
```

Question: What did this media query do?

7. For each of the media queries, use the developer tools to set the width that will trigger the change.
